## LUXEMBOURG INSTITUTE OF SCIENCE AND TECHNOLOGY (LIST)

The Luxembourg Institute of Science and Technology (LIST) is a mission-driven Research and Technology Organization (RTO) that develops advanced technologies and delivers innovative products and services to industry and society. As a major engine of the diversification and growth of Luxembourg's economy through innovation, LIST supports the deployment of a number of solutions to a wide range of sectors, including energy, IT, telecommunications, environment, agriculture, and advanced manufacturing at national and European level. Thanks to its location in an exceptional collaborative environment, namely the Belval Innovation Campus, LIST accelerates time to market by maximizing synergies with different actors, including the university, the national funding agency and industrial clusters.

## THE ENVIROINFO CONFERENCE WILL BE HELD IN LUXEMBOURG IN SEPTEMBER 2017

The 31st edition of the conference EnviroInfo will take place in Luxembourg on September 13-15, 2017.

The EnviroInfo 2017 is the 31st edition of the long standing and established international and interdisciplinary conference series on leading environmental information and communication technologies.

For the first time, EnviroInfo will be organized in Luxembourg by the Luxembourg Institute of Science and Technology (LIST). Luxembourg and LIST offer a unique setting for the conference.

The country is at the intersection of the German and French-speaking communities that each have different societal views on environmental topics and challenges.

Luxembourg is specifically challenged by environmental issues that cross borders, be it the impact of environmental disasters, emissions caused by the transborder mobility due to the international workforce of the country, or the interoperability of environmental decision systems in general.

All these challenges are common to many Environmental Informatics projects. Luxembourg's particular location makes the country an excellent place to discuss these topics.

Furthermore, Luxembourg and LIST are very much interested in research with a measurable positive impact on society and quality of life.

EnviroInfo2017 will be organized by the Luxembourg Institute of Science and Technology (LIST) in collaboration with the German Informatics Society and the Technical Committee of Environmental Informatics.
